5 star business from a 5 star serviceman, Daniel. Needed a window tinting, called everyone around the Miramar area and they were quoting high. Called this place up, talked to Daniel and he quoted me the best price. He offered to do the service at my apartment even which is a very convenient service offered! I ended up just going to the garage since I needed to be in Miramar anyways. Met up for my appointment time, met Daniel, talked while he worked on my window, and when he was done, Daniel thoroughly explained the aftercare process. I was out of there in 30 mins. Daniel was very professional and enhanced my experience with this company. 100% excellent service and professionalism. If you need some windows tinted, look no further, this is the place.

The team at Superior Window Solutions is a great company for all your tinting needs. They are responsive to all questions and complete the work quickly with competitive pricing. I will be happy to refer them to all my friends and family that are looking to add some tinting to their homes. The daytime privacy and sun reflectively of the product they use is fantastic as well!

Awesome tinting service. Got my car tinted here. The installer was awesome. Funny guy and got the job done quick. I got quoted for the job and this place was one of the less expensive places. Will definitely recommend to anyone who wants their car tinted.

Got my 2010 Honda Fit tinted here in May of 2019. Prices were very fair and they did a really good job on my car. They explained the process ahead of time, showed me my options, and had the car done in about 2 hours flat.

10/10 would recommend.

We have a huge picture window (12' x 6') over looking the mountains north of downtown La Mesa. While the window was previously tinted to block sun and heating exposure, the art work my young children etched into it and the scratches from the scrubbing sponge when they were "helping" with house cleaning left a lot to be desired.

The entire process with Superior Windows Solutions was incredibly efficient and professional. Price was reasonable and affordable. For us this involved removal of the old tinting and replacement with new tinting. and Time to schedule and actual work time was very reasonable, the technician arrived within the promised window of time, with lots of communication and transparency, and the work was completed quickly to our satisfaction. It's been about a year now, and the tinting is still perfect and as we would hope it would be.

I had Superior Window Solutions work on both our old house and our current one to control light and heat coming in through high windows. Blinds and curtains weren't feasible or desirable for us, since we value natural light and being able to see out. They had the most reasonable costs out of three companies that I compared at the old house, and I went with them again this time around. Both times, the guys who showed up for the quote were quick and professional, and the installers did a fantastic, thorough, neat job and let us know what to expect (the film needs to settle for a day or so, etc). Our house stays noticeably cooler and the film is sturdy enough to not have gotten scratched even though we have one very determined dog who scratches at the back patio door where we also had film installed. Would definitely recommend this company!

We had all the windows tinted on our condominium about 6 years ago because the sun was ruining our furniture. The tinting has held up very well and there has been no bubbling or streaking. I would highly recommend this company.

Jimmy and Virgil were a pleasure to work with. They were easy to get ahold of and responded quickly. Scheduling was a breeze and the work looks great. The price was reasonable, especially for the quality of materials and workmanship.

We used their "Turf Shield" to protect the newly installed turf from a few windows that's could have burned it and "InvisiShield" on the other windows on the back of the house just in case. We went with 30% ceramic film for the front of the house and the nursery and so glad we did. We definitely notice a difference in heat reduction in those rooms which get direct sunlight for most of the day. I would recommend that anyone considering installing turf to call Superior Window Solutions to protect their investment.
